

Amendments to the Drawings:

The Examiner objected to Figs. 2C and 3 as containing elements not shown in the figures and the Examiner objected to Fig. 11D as containing a superfluous character (i.e. a "?"). Applicants have enclosed herewith copies of Figs. 2C, 3 and 11D having proposed drawing changes marked thereon in red. In particular, Applicants have amended Figs. 2C and 3 to include reference numerals to identify the elements mentioned by the Examiner. Applicants have amended Fig. 11D to delete the "?" at the top of the figure. Approval of these changes is respectfully requested.

The Examiner also questioned whether drawing Figs. 7A, 7G, 8A, 8C, 10C and 14A should be color drawings since colors were referenced in the discussion of these drawings in the specification. Applicants have amended the specification to remove the reference to colors, and Applicants respectfully submit that color drawings are not required for this application. Accordingly, the objection to drawing Figures 7A, 7G, 8A, 8C, 10C and 14A is believed to have been overcome.
